About Us

Growth Energy is a new, proactive group committed to the promise of agriculture and growing America's economy through cleaner, greener energy. Growth Energy members recognize America needs a new ethanol approach. Through smart policy reform and a proactive grassroots campaign, Growth Energy promotes reducing greenhouse gas emissions, expanding the use of ethanol in gasoline, decreasing our dependence on foreign oil, and creating American jobs at home.

At this pivotal time in America's history, we joined together and created Growth Energy because:

- **We believe** ethanol is our nation's growth energy, renewable, realistic and clean-burning.
- **We believe** a strong biofuels industry will create American jobs and stimulate economic growth.
- **We believe** we can continue creating cleaner and greener fuels through 21st century technology and innovation.
- **We believe** biofuels will stimulate the growth of sustainable agriculture worldwide, providing crops for both food and fuel.
- **We believe** that an energy independent America is achievable and ethanol is the most important first step to making it a reality.

This is about our energy future. And enhancing our way of life.

Our Message

Ethanol is America's best renewable fuel, reliable and affordable now. It's high-tech, homegrown and on the verge of innovative breakthroughs that will make it even cleaner and greener for the long-term.

Ethanol is vital to achieving greater American energy independence. It is today's only viable and available fuel that can be substituted for gasoline. Unlike oil, ethanol is renewable — it will never run out. As science moves from making ethanol from corn to producing it from corn cobs and other plant materials, ethanol will continue to be a sustainable and effective energy solution for the world. America's dependence on foreign oil causes enormous problems for Americans every day — raising the prices on everything from gas to groceries and sending money and jobs overseas.

Ethanol is America's green growth energy solution to our foreign oil problem.
